EXPERIENCE

Full stack Developer

Neurix.dev

Leading developer and project manager for Neurix.dev, a platform focused on building modern developer tools and scalable software products.

Architecting full-stack applications using Next.js, React, and cloud infrastructure with a focus on clean UI and performance.

Managing product vision, engineering direction, and open-source community engagement.

Frontend Developer Jun 2025 — Oct 2025

Axamine.ai Pvt. Ltd

Developed a complete client-facing website using modern frontend technologies including React and Next.js.

Worked closely with design and backend teams to deliver a responsive and user-friendly UI.

MERN Stack Developer Sep 2025 — May 2026

Vrdhtech - USA

Developed a full-stack business website to help clients establish an online presence.

Implemented scalable backend APIs and modern frontend components.

Automation Engineer Jan 2025 — Apr 2026

Gruj Sajavat - surat

Designed and implemented automation workflows and scraping pipelines using Python and n8n.

Improved accounts and finance management reliability across multiple branches.

Creative Team Member / Social Media Lead Jun 2024 — Sep 2025

GDG and AWS Communities

Managed event coverage, photography, and content editing for AWS community events in Ahmedabad & Vadodara.

Led social media strategy, content creation, and analytics for the GDG Vadodara campus chapter.

Boosted online engagement through real-time social media updates and tech event promotion.

PROJECTS

Croma — AI Developer Tools Browser Extension Jun 2026 — Present

Tech Stack: JavaScript, Chrome Extension APIs, OpenAI API

Built a browser extension that auto-explains selected code, catches console errors, monitors slow API calls, and answers questions about the current webpage.

Published a companion blog post documenting the build process.

ONE — AI Coding Portfolio Platform May 2026

Tech Stack: Next.js, Supabase, SSR, OpenAI GPT-4o, Realtime API

Built an AI platform that turns a developer's resume into live proof of coding ability, demonstrating claimed skills with real code examples.

EMA — Bulk Cold Email Workflow

Built a workflow to send 2,000+ emails in a single run while avoiding spam filters, eliminating manual outreach time when contacting researchers.

Blockchain From Scratch

Implemented a blockchain from the ground up, including block mining, proof-of-work, and chain validation logic.

OPEN SOURCE & MENTORSHIP

Mentor, GirlScript Summer of Code (GSSoC) Jun 2025 — Jul 2025

Led and mentored 55+ contributors alongside a project administrator in GSSoC 2025.
Guided contributors on Git/GitHub workflows, code quality, and open-source best practices.
Ensured smooth collaboration and impactful contributions across multiple open-source projects.

EDUCATION

B.Tech, Computer Science Engineering (AI)

ITM SLS Baroda University, Gujarat 3rd Year — Ongoing
Intermediate (12th), Unique Intl. Public School, J&K 2022
Matriculation (10th), Apollo Public School, Punjab 2020

EXTRA-CURRICULAR ACTIVITIES

Freelance video editor and content creator — edited 100+ short-form videos; co-own a YouTube channel with 1.5K+ subscribers and 5 M+ views.
Passionate photographer covering AWS and GDG tech events in Ahmedabad and Vadodara.
Active open-source contributor and community builder in the Indian developer ecosystem.
Languages: English — Professional Working Proficiency; Hindi — Professional Working Proficiency.

ACHIEVEMENTS

15+ paid client projects delivered successfully with strong feedback and repeat engagements.
GitHub: 60 repositories, 472 contributions, 31 stars.
Research paper : Menopause and Its Effects on Women's Physiological System, studying psychological and physiological impacts with the aim of journal publication.
